

Sprint 1 Review – Team 13

Expectations

1. Completed use-cases covering broad use of the system.

Comments: Had respectable number of use-cases. Also, the quality was good not great.

2. Created UML covering the system.

Comments: The UML diagram was good, could be more detailed. Had a thoughtful sequence diagram.

3. Version 0 project created in team repository, being worked by team following software dev standards, and deployed to AWS using Jenkins.

Comments: Version 0 was up and running on AWS with Jenkins integration working well.

4. Demonstrated use of Jira.

Comments: Backlog had just 6 tasks. No tasks for uses cases were created. Start creating tasks and have them prioritized.

Grade: B+
